**Generic Course Structure for Bachelor of Design**

Each standard subject is worth 12.5 credit points. A standard full-time study load is four subjects (50 points) per half-year period. The Bachelor of Design requires the successful completion of 300 points. Each major and double major combination within the Bachelor of Design is slightly different, and each requires careful planning and consideration to successfully complete. Your intended major(s) will determine your first and second year subjects leading to a major.

To find these subjects, use the Course Planning tools and Course Maps found here: [edsc.unimelb.edu.au/undergraduate/course-planning/bdes](http://edsc.unimelb.edu.au/undergraduate/course-planning/bdes)

**Subjects leading to a major**

Subjects leading to a major(s) develop your knowledge in a particular area of study and enables you to meet the prerequisite requirements of major subjects.

**Major Subjects**

A single major consists of 50 points of study at third year level within a single discipline. There are 12 majors available in the Bachelor of Design, and students must complete one with a maximum of two. Double majors are only available in some disciplines.

**Breadth Subjects**

Breadth subjects are subjects taken from outside your area of study. The breadth options for Bachelor of Design students are restricted depending on your intended major(s). Detailed information on these non-allowed breadth subjects is available here: [handbook.unimelb.edu.au/components/b-des-infspc-2](http://handbook.unimelb.edu.au/components/b-des-infspc-2)

**Design Elective Subjects**

Electives are taken from subjects offered within the Bachelor of Design that are not part of your intended major(s). Electives can be used to complete double majors, minors and specialisations.
NOTES ABOUT THE BACHELOR OF DESIGN

Course requirements
- Maximum 125 points at level 1
- Minimum 62.5 points of level 1 Design
- Minimum 62.5 points at level 2 Design
- Minimum 75 points at level 3 (including 50 points of a prescribed Bachelor of Design major at level 3)
- Maximum 37.5 points of breadth at level 1
- Minimum 50 points, maximum of 75 points of breadth including at least 12.5 points at level 2 or level 3
- Course progression rule: Completion of at least four subjects (50 points) at each year level before being able to progress to the next year level

Note: For some majors and double major combinations, breadth and elective rules might be slightly different.

Majors
There are 12 majors available within the Bachelor of Design with multiple double major combinations possible.

The majors available are:
- Architecture
- Civil Systems
- Computing
- Construction
- Digital Technologies
- Graphic Design
- Landscape Architecture
- Mechanical Systems
- Performance Design
- Property
- Spatial Systems
- Urban Planning

For each major, a sequence of specific subjects must be taken to meet the prerequisites for the final major subjects. The amount of subjects leading to a major needed will be different for each major. This may affect the number of electives and/or breadth that can be taken.

Double Majors
A double major involves completion of two majors within 300 points by following set course plans.

It is important to be aware that the subjects you take in a double major may be different to those in a single major. Students who wish to take a second major may need to replace breadth subjects with Design elective subjects. If you intend on completing a double major you must follow the example course maps and use the course planning tools available on the Environments and Design Students (EDSC) website.

Minors
Minors are a shortened sequence of subjects taken from particular majors within the Bachelor of Design.

A minor consists of 50 points (typically four subjects) of sequential studies taken alongside a single major.

Minor subjects are taken through Design elective subjects. Many minors have prerequisites that must be taken first, meaning some minors may need all six elective subjects to complete.

Minors in Architecture, Construction, Property, Landscape Architecture and Spatial Systems will offer 50 points of credit into a 300 point cognate Masters.

Note: Minors are not available in Civil Systems or Mechanical Systems.

Specialisations
Specialisations consist of two level 3 subjects (25 points) which do not form part of an existing major. These subjects focus on particular themes relevant across multiple disciplines.

Specialisation subjects are taken through Design elective subjects. Be aware that some of these subjects may have prerequisites from first and second year.

The available specialisations are: Building Information Modelling (BIM), Design Visualisation, Environmental Design, Event Design, Design Histories, Towards Practice, and Transport Design.

Breadth
Make sure you use the handbook to find what subjects you can take as breadth: handbook.unimelb.edu.au/breadth-search and check that it will count as a breadth within your major: handbook.unimelb.edu.au/components/b-des-infspc-2

Electives
For a complete list of elective options for Design students: handbook.unimelb.edu.au/components/b-des-infspc-1

Maths Prerequisites
A score of at least 25 in VCE Mathematical Methods 3/4 or equivalent is needed for the following majors: Civil Systems, Computing, Construction, Mechanical Systems, Property, and Spatial Systems.

If you do not meet this requirement, you may be eligible to take the subject MAST10012 Introduction to Mathematics or complete the Calculus and Probability Online subject in the summer.

- MAST10012 Introduction to Mathematics handbook.unimelb.edu.au/subjects/mast10012
- Calculus and Probability Online commercial.unimelb.edu.au/custom-education/search-courses/mathematics/calcpob

Note: This is a non-award subject that will not be counted for credit towards your degree.

For more information:
Learn more about the specific requirements of your course by referring to the University Handbook – handbook.unimelb.edu.au
Look at the Environments and Design Students website – edsc.unimelb.edu.au
Use the blank course structure below as a guide to plan your course. It is easiest to plan your course while referring to your course-specific requirements and the University Handbook.

You do not have to plan your whole degree at this point but the subjects that you choose in Year 1 can impact on your choices in Year 2 and 3.

Remember to consult the University Handbook to find out more about course requirements and subject availability, as well as breadth and elective options: handbook.unimelb.edu.au

### WHAT DO I DO NEXT? ENROL IN YOUR SUBJECTS (STUDY PLAN)

Once you have mapped your subjects you can add them to your Study Plan via my.unimelb for the current year only. For information about enrolling in subjects visit: students.unimelb.edu.au/subject-enrolment

Please note: You normally have until the end of the second week of classes to change your subject selection for the semester.
ENRICH YOUR STUDIES

HOW CAN STOP 1 HELP?

Stop 1 can connect you with the full range of student services to support your success while studying at the University including:

- administration
- course planning and enrolment
- health and wellbeing
- housing and financial aid
- equity and disability support
- careers and employability development
- academic skills and learning support
- overseas study

Remember, our support services are not just for when things go wrong but also to extend and develop your skills and experience.

Access these services and more:
services.unimelb.edu.au/finder

Find out the best way to manage your admin, study effectively, maximise your wellbeing and prepare for your future: students.unimelb.edu.au

International student visa holders: please note you must be enrolled in 50 credit points in each half-year period unless you have approval to reduce your study load.

ACHIEVE YOUR ACADEMIC GOALS

Academic and communication skills
Find resources and programs to help you develop the reading, writing and listening skills needed to succeed in your studies.

Take the Diagnostic English Language Test (DELA) to get personalised results and recommendations to develop your ability to communicate ideas clearly and fluently using academic English language.

Overseas study
Participate in an overseas study program and gain experience as well as credit towards your course.

Concurrent diploma
Complete an additional qualification in computing, music, mathematical sciences or languages alongside your bachelors degree.

Enhance employability skills
Check your faculty's website for internships, work placements, research or volunteering options to put your knowledge and skills into practice.

There are other opportunities such as industry events, public lectures and professional skills workshops. You can also volunteer in your community, meet with an alumni mentor or join a student club.

Notes:
